

# Case Study

**Client:** Petrofac Limited  
**Project:** Thames Fields Decommissioning  
**Location:** Southern North Sea  
**Tasks:** Well Plug & Abandonment  
Subsea Tree Removal  
**Dates:** April - September 2018  
**Duration:** 149 days  
**Equipment:** Surface Diving System (Nitrox)

KD Marine deployed a Surface Diving System onto the Jack-Up Rig the Ensco 72 to provide Diving Operations in support of the Decommissioning of the Thames Gas Field in the Southern North Sea 80km Offshore the UK mainland.

Diving Operations were successfully performed on seven (7) wells without any accidents or incidents, prompting the Client Offshore Manager to state: 'It was a real pleasure working with the KD Marine guys and hopefully we will see them again one day- oh not forgetting the excellent communications... from the shore side engineers who were involved'.
